START HERE

Screen Time Control

Thank you for your purchase. This page gets you started in about five minutes.

YOUR APP LINK

https://screentime-control.vercel.app

Open it on your phone by scanning the code, or type it into any browser.

Get started in 5 steps

1. **Open the app link** on your phone or computer.
2. Tap **Create an account**. Enter your email and a password of **at least 8 characters**.
3. **Confirm your email.** We send you a message with a link. Open it. If it does not arrive, check your Spam or Junk folder.
4. Go back to the app and **sign in** with the same email and password.
5. When asked, **enter your licence key** and press **Activate**. You only do this once.

> **Where is my licence key?** It is on your Payhip receipt and in the email Payhip sent you after your purchase. **One key works for one account.** Keep it private.

Then use it

1. Open **Children & limits**, press **+ Add child**, and set a name and a daily limit in minutes.
2. On **Today's dashboard**, press **Log in / start** on the child's card when they begin a screen.
3. Press **Log out / stop** when they finish. The bar turns green, amber, then red as they near the limit.

Put it on your phone

iPhone (Safari): tap Share, then **Add to Home Screen**. **Do this to get phone alerts** (iOS 16.4 or later). Then open the app from the Home Screen, go to **Account** and tap **Turn on alerts**.

Android (Chrome): tap the menu, then **Install app** or **Add to Home screen**.

Good to know

- It **tracks time**. It cannot see or block a child's device.
- The timer stops itself at the daily limit, and after 3 hours if you forget.
- Phone alerts can arrive when the app is closed. A Focus mode on the phone can silence them.

Full guide: choose **Help guide** in the app menu, or open screentime-control.vercel.app/help
